

HYDROMOL[®]

CREAM

AN EMOLLIENT CREAM TO
LUBRICATE & HYDRATE
DRY SKIN

For the management of
dermatitis/eczema, psoriasis,
ichthyosis, senile pruritus
or any other dry skin conditions

INFORMATION FOR USERS

PLEASE READ THIS LEAFLET BEFORE USE

Formulated with key ingredients for skin health, Hydromol Cream is a soft cream which moisturises the skin.

Hydromol Cream contains a naturally occurring moisturising agent as well as oils which prevent moisture loss from the skin. This helps to relieve itch, lubricate and soften the skin.

Hydromol Cream is used topically for the treatment of dry skin, a feature present in all forms of dermatitis/eczema, psoriasis and all degrees of ichthyosis and senile pruritus.

Hydromol Cream contains liquid paraffin, isopropyl myristate, cetomacrogol emulsifying wax, myristyl myristate, sodium pyrrolidone carboxylate, ceteareth-20, Phenonip XB, sodium lactate solution, purified water and is available in plastic tubes of 50g and 100g and tubs containing 500g with a pump dispenser.

1 INSTRUCTIONS FOR USE

Hydromol Cream is for external use only and should only be applied to the skin.

Adults, elderly and children: apply liberally and frequently to the affected area and smooth into the skin in the direction of hair growth. Hydromol Cream may be used 2-4 times a day or as often as required. It is especially beneficial when used immediately after washing or bathing as water is still trapped in the skin for extra hydration and as the warmth of the skin may increase absorption.

Hydromol Cream is not contraindicated in pregnancy and breast-feeding.

2 WARNINGS AND PRECAUTIONS

Do not smoke or go near naked flames - risk of severe burns. Fabric (clothing, bedding, dressings etc) that has been in contact with this product burns more easily and is a serious fire hazard. Washing clothing and bedding may reduce product build-up but not totally remove it.

Talk to your doctor or pharmacist before you use Hydromol Cream if your skin is badly cracked, infected or bleeding.

Do not use if you are allergic (hypersensitive) to any of the ingredients in Hydromol Cream. Do not use on the nappy area. Some ingredients may cause skin reactions (e.g. contact dermatitis). If your condition worsens or you experience any undesirable effects, stop using Hydromol Cream and consult your doctor or pharmacist.

If you are using medicines which are also to be applied to the skin you should talk to your doctor or pharmacist before using Hydromol Cream as it might not be suitable to apply other topical preparations at the same time.

Avoid contact with eyes. If contact occurs, rinse opened eye for several minutes under running water. If accidental ingestion occurs, adverse effects are unlikely to occur.

Report any safety concerns to Alliance Pharmaceuticals Limited
Tel.: +44(0) 1249 466 966, email: pharmacovigilance@alliancepharma.co.uk

3 STORAGE

Store in a cool, dry place, below 25°C.

Keep out of the sight and reach of children.

Batch number and use-by date are stated on the carton and on the base of the tube (or on the labelling of the tub). Hydromol Cream should not be used after the use-by date; this date refers to the last day of that month.

Do not use if package is damaged or if you notice a change in the colour or feel of the cream.

Keep in the original container.

Dispose of responsibly and according to official regulations.
