

HYDROMOL® OINTMENT

FOR
ECZEMA, PSORIASIS
AND OTHER DRY
SKIN CONDITIONS

3^{IN}1

ALL PURPOSE EMOLLIENT
SOAP SUBSTITUTE
BATH ADDITIVE

Suitable for all ages

INFORMATION FOR USERS

PLEASE READ THIS LEAFLET BEFORE USE

Formulated with key ingredients for skin health, Hydromol Ointment is a soft ointment which moisturises the skin.

Hydromol Ointment is intended to be used liberally, as required, for the management of eczema, psoriasis and other dry skin conditions.

A 3 in 1 all-purpose emollient, bath additive and soap substitute, it contains no fragrances, colourings, additives or preservatives and is suitable for all ages.

Hydromol Ointment contains cetomacrogol emulsifying wax (contains cetostearyl alcohol and macrogol cetostearyl ether), yellow soft paraffin and liquid paraffin.

1 INSTRUCTIONS FOR USE

For external use only. Keep in the original container and replace cap after use.

All-purpose emollient – Apply to the affected area with a smooth stroking action in the direction of hair growth. Use liberally as often as required. Ensure hands are clean before applying.

Bath additive – Melt Hydromol Ointment in warm water in a suitable container, add mixture to the bath. Care should be taken as Hydromol Ointment will make the surface of the bath slippery.

Soap substitute – Use as required when washing.

Always take special care when using emollients after bathing; this may present an increased risk of slipping and falling.

2 WARNINGS AND PRECAUTIONS

Do not smoke or go near naked flames - risk of severe burns. Fabric (clothing, bedding, dressings etc) that has been in contact with this product burns more easily and is a serious fire hazard. Washing clothing and bedding may reduce product build-up but not totally remove it.

Talk to your doctor or pharmacist before you use Hydromol Ointment if your skin is badly cracked, infected or bleeding.

Do not use if you are allergic (hypersensitive) to any of the ingredients in Hydromol Ointment. Some ingredients may cause skin reactions (e.g. contact dermatitis). If your condition worsens or you experience any undesirable effects, stop using Hydromol Ointment and consult your doctor or pharmacist.

If you are using medicines which are also to be applied to the skin you should talk to your doctor or pharmacist before using Hydromol Ointment as it might not be suitable to apply other topical preparations at the same time.

Avoid contact with eyes. If contact occurs, rinse opened eye for several minutes under running water.

Report any safety concerns to Alliance Pharmaceuticals Limited
Tel.: +44(0) 1249 466 966, email:

3 STORAGE

Store in a cool, dry place, below 25°C.

Keep out of the sight and reach of children.

Batch number and expiry date are stated on the carton and on the folded end of the tube. Hydromol Ointment should not be used after the expiry date; this date refers to the last day of that month.

Do not use if package is damaged or if you notice a change in the colour or feel of the ointment.

Keep in the original container.

Dispose of responsibly and according to official regulations.
